

Jared Douville

Objective

A highly skilled and experienced Principal Solution Architect with a passion for DevOps and extensive expertise in AWS, Terraform, and OpenTofu. Seeking to leverage my technical proficiency and customer-centric approach to drive success and innovation at Gruntwork.

EXPERIENCE

Hackerone, Remote – Bug Hunter

April 2022 – PRESENT

- skilled bug hunter, with a proven track record in identifying and reporting security vulnerabilities in software, websites, and applications.
- Security Architecture: Designing and implementing secure architectures for cloud and on-premises environments, including network segmentation, identity and access management (IAM), and encryption protocols.
- Threat Intelligence: Monitoring and analyzing threat intelligence sources to stay informed about emerging security threats and vulnerabilities relevant to DevOps environments.
- Security Automation: Developing automated security testing and monitoring processes using tools like Chef, Puppet, Ansible, or Terraform to ensure continuous security compliance.

EDUCATION

CompTIA Security+ Certificate

Issued Dec 2022 • Expires Dec 2025

credential ID 770PKEPNLPVEKEKW

- Industry standard penetration testing tools
- Identifying and exploiting different network services
- Exploiting web applications through today's most common vulnerabilities

- Understanding Windows active directory and attacking Kerberos
- Post exploitation techniques (with Powerview, Bloodhound and Mimikatz)

Linsey Thurber, Red Deer – *High School Diploma*

July 2006 – Jul 2009

Graduated high School with Honours
